About your procedure: Check with your physician about taking prescribed medications before the test. Ask your physician about how to take diabetic medications or insulin the day of your procedure. Wear a 2-piece outfit and shoes that are comfortable for walking the day of your procedure. Bring a list of your current medications with you. Please do not apply cream, oils, or powders to the chest area. Please arrive 45 min. before your scheduled appointment for preparation. For a complete test description, request a patient itinerary from Centralized Scheduling. If you have high blood pressure, we prefer that you not take your medication the morning of the test.
