

For more than 20 years, Memorial Family Pharmacy has filled prescriptions for the people of our community as well as many Memorial Team Members. However, significant changes in retail pharmacy economics and the opening of many new pharmacies throughout the area have caused declines in both the number of prescriptions being filled at Family Pharmacy and reimbursement levels for those prescriptions.

After careful review of the long-term projections for this pharmacy model, we have decided to close Family Pharmacy and transfer the prescriptions to CVS. This decision will allow all customers who need to refill their prescription easy access at the CVS pharmacy of their choice without having to take any additional actions.

The last day of operation for Memorial Family Pharmacy will be Nov. 30. Beginning Dec. 1, all previous Family Pharmacy prescriptions will be available at any CVS location. If you choose to transfer your prescription to a pharmacy other than CVS you will need to contact CVS to provide transfer instructions.

We are working with the dedicated Team Members of Family Pharmacy to assist them through this transition and we do sincerely appreciate their high quality contributions over the years.
