

For Immediate Release  
November 9, 2010

***Memorial Health System will celebrate Urgent Care Awareness Week  
November 8-12***

Med-Point has been providing urgent care services to our community for more than 26 years. Urgent care centers provide immediate medical care for minor emergencies, illness and injury that are not severe enough for the Emergency Room. Urgent care centers provide convenient, high quality care, have weekend and evening hours, take walk-in patients during all open hours and have x-ray and lab services available on site.

Medical care is available for conditions such as cuts and lacerations, sprains/strains, colds, fever, flu, insect bites, ear infections, rashes, back aches, vomiting and diarrhea, stomach aches, simple fractures, and many other illnesses that are not life or limb threatening.

Memorial Health System offers two types of urgent care facilities to best meet the needs of your family: Med-Point, staffed by board-certified physicians and nurses; and *MEDPOINT express* clinics, staffed by certified nurse practitioners.

**Please note: Flu shots are still available at *MEDPOINT express* clinics.**
